

April 23, 2024

Online Management Console (OMC) Version: **4.0.110**

Mobile App Version: **5.0.438**

New Features & Improvements

Saving Counts is More Reliable

What it does:

When you create or update a Count, the app automatically saves a data backup on our servers.

Why it matters:

This ensures your data is safe even if something goes wrong with your device.

Data Syncs Faster

What it does:

When you finish working on a Count, it instantly syncs with our servers.

Why it matters:

This keeps your data consistent across all your devices and reduces the chance of losing anything.

Backup Your Data Easily

What it does:

You can now copy and send all your data to our servers with just one click in the settings.

Why it matters:

This adds an extra layer of security, so you can always get your data back if your device is damaged.

Easier Troubleshooting

What it does:

We've added a tool that helps us understand and fix any issues you might have.

Why it matters:

This makes it easier for us to assist in solving any support issues. We can easily review and pinpoint any problems and resolve them quickly.

Solution Enhancements

Editing Counts is Smoother:

We fixed some problems with editing Counts to ensure your data stays accurate.

Saving Counts:

Updating a Count saves it as a JSON file on our servers and enhances data consistency.

Delete Items Easily:

You can delete items from a Count while editing it.
