trakr Counting Dashboard - OMC Version: 4.0.279

Improved Reports Page

What it does:
We have updated report names and descriptions for easier understanding and navigation.

Why it matters:
It helps users quickly find the reports they need without confusion.

Date Formatting Standardization

What it does:
Applied a consistent date format across the platform.

Why it matters:
It makes date-related data more apparent and more readable.

Timezone Updates

What it does:
Corrected how user-saved time zones are handled, ensuring dates in counts, receives, picks, and reports display accurately. Time zones are now required fields.

Why it matters:
It improves accuracy and ensures data matches your local time zone for better reliability.

Data Integrity Fix

What it does:
Fixed an issue where deleting Receive and Picking data didn't update On-hand data correctly.

Why it matters:

Ensures inventory data always reflects the latest changes.

New Reports

What it does:

Four new reports were added to trakr Counting.

- Total On-Hand Report
- Picked Inventory Report
- Received Inventory Report
- Re-Order Report

Why it matters:

This provides more detailed insights to help you better manage inventory.

Report Modifications

What it does:

- Picklist Report: Adjusted PDF view to display storage location below the QR code and enable text wrapping for long names.
- Count Report: Updated to show product storage instead of deprecated areas.

Why it matters:

Enhances report clarity and ensures they reflect the most up-to-date information.

trakr Counting Hand Held - v7.0.43

Graphic Fixes for iPhone 14

What it does:

Resolved visual issues on iPhone 14 devices.

Why it matters:

It ensures that the app looks great and works seamlessly on all devices, providing a consistent experience for everyone.

Performance Improvements

What it does:

Optimized loading times for Quick Pick and Receive actions.

Why it matters:

Speeds up workflows, making inventory tasks faster and smoother for your team.

Data Integrity Fixes

What it does:

Fixed an issue where deleting Receive and Picking data didn't update On-hand data correctly.

Why it matters:

Ensures your inventory data is always accurate and up to date.

Enhanced Messaging for Halo

What it does:

Clearer messaging for Picking, Receiving, and other actions in the Halo feature was added.

Why it matters:

It improves communication, so you always know what's happening with your inventory.
