trakr Counting Dashboard - OMC Version: 4.0.251

## New Inventory Management Features

### What it does:

**Picking:** Select a specific quantity of a product from designated storage, and the inventory count updates automatically—no manual adjustments are needed.

**Receiving:** Adds products to storage, automatically adjusting your inventory count.

**Pick List:** Allows users to create a list of items for later retrieval, such as purchase or work orders, with an option to print for other departments or team members.

### Why it matters:

These features simplify inventory management by automating quantity updates and improving organization. Pick lists also streamline collaboration between departments, saving time and reducing errors.

## Enhanced Product Management Features

### What it does:

**Product Storage** is a new, more flexible way to organize inventory that mirrors your setup. It replaces the previous system of assigning products to “areas.” Now, you can specify exact locations down to aisles, shelves, or bins.

### Why it matters:

**Product Storage** aligns with the real-world layout of your storage, making it easier to locate items and enabling faster, more accurate retrieval. This enhanced organization is beneficial for larger and more complex warehouses.

## Improved Reporting

### What it does:

**Total On Hand Report:** This report automatically includes counts from recent picking and receiving activities, keeping you updated.

**Updated Count Report:** Offers detailed information on products stored in multiple locations.

**Product Storage Count Report:** Breaks down counted items by specific storage locations, making reviews straightforward.

**Excel Export:** Exports reflect the new Product Storage structure, giving you greater control over organizing and managing data.

**Why it matters:**

These reports provide a clearer, more accurate picture of your inventory and storage details, ensuring better data accuracy for decisions and streamlined reviews.

These updates enhance flexibility, accuracy, and efficiency across your inventory management workflow—perfect for businesses of all sizes!

trakr **Counting** Hand Held - **v7.0.28** (iOS) & **v7.0.27** (Android)

## New Picking and Receiving Features

**What it does:**

The mobile app now supports receiving and picking products, allowing you to manage stock levels effortlessly. When you receive or pick products, inventory counts adjust automatically in real time.

**Why it matters:**

These new features streamline inventory operations, making it easier to track stock levels accurately without manual updates, saving time and reducing errors.

## Better Product Tracking & Improved Organization

**What it does:**

Enhanced tracking for where products are counted, picked, or received provides greater visibility across locations, ensuring you always know the status of your inventory.

#### Why it matters:

With better organization and location tracking, managing stock across multiple areas becomes more efficient, giving you a clearer view of your inventory's current position.

### Enhanced Barcode Scanning

#### What it does:

The app now supports scanning various barcode types, including UPCs, product labels, and shelf labels, making product searches faster and more flexible.

#### Why it matters:

Multiple scanning options reduce search time and errors, enhancing efficiency and accuracy in your inventory workflow.

### Bug Fixes & Performance Boosts

#### What it does:

The latest update includes bug fixes and performance enhancements, making the app faster and more reliable for your inventory tasks.

#### Why it matters:

Improved performance and reliability mean quicker, uninterrupted workflows, allowing you to complete tasks quickly.

### UI Enhancements

#### What it does:

**Cleaner & More Intuitive Interface:** The app's redesigned layout simplifies navigation, offering a more intuitive experience that helps you accomplish tasks with fewer steps.

#### Why it matters:

The updated interface improves usability, making inventory management faster, easier, and more precise for all users.
